## EDUCATION

2022-2025

**Manchester Metropolitan University**  
**Undergraduate Sound and Music Design (2:1)**

- One of my units involved sound design for film clips, which involved recording sound effects to edit and pair with the video, ranging from public ambient recordings to gory horror sound effects.
- Created sonic branding material for a podcast; these were short sonic themes for the start, interlude, logo, and end of the podcast.
- Created a website using HTML which reflects my personal branding. ([arronware.com](http://arronware.com))
- Created an entirely original piece to be performed as a group. This developed my teamworking skills as we were paired with people of different backgrounds and skillsets. Producing something to a good standard, whilst also breaking us out of our comfort zones, venturing away from our usual roles.
- Becoming heavily familiar with a complex audio mixing desk (SSL System T S300), the outboard rack equipment and Dante for using across different studio spaces simultaneously. Troubleshooting this equipment became commonplace so it has become second nature to me.

2019-2022

**Grimsby Institute College**

- BTEC: Level 1/Level 2 Information and Creative Technology (Double Distinction\*)
- T Level: Digital Production, Design and Development (Merit)

2014-2019

**Oasis Academy Immingham/The Academy Grimsby**

- GCSEs: Triple Science, English Lit/Lang, Mathematics, Film Studies
- BTEC: First Award in Creative Digital Media (Merit)

## RELEVANT EXPERIENCE

11/24- **British Heart Foundation**

- I learned vital customer service skills whilst working the till and standing by the door to greet customers. I also frequently worked below the shop floor organising stock and preparing them to be put on display.

04/17 **DFDS Seaways**

- I had 2 weeks work experience at DFDS Seaways, where I spent a day with the software developers and with technical support. This required me to be on call with dispatch and configure the new office machines, which has furthered my confidence in communicating with specialised vocabulary whilst problem-solving.

10/21–03/22 **Boysen B**

- I was tasked with producing websites that aimed to educate on various impacts of climate change. This developed my teamworking skills in a web development context, as the impact calculations I undertook utilised many factors which required group communication.

#### 06/22 **Microsoft: Azure AI Fundamentals**

- Gained insightful knowledge into AI and machine learning concepts to attain a certification in Microsoft Azure services.

## **POSITIONS OF RESPONSIBILITY**

#### 9/22-6/25 **MMU Film Society Member**

- As I am passionate about film, I regularly attend the university's film society meetings, where we discuss filmmaking and debate upon the merits of certain directorial techniques. This has strengthened my communication skills and my ability to converse with new people who share different tastes.
- I started a Photography Society that averages 20 members

## **ADDITIONAL SKILLS**

### **IT:**

- Have basic proficiency in Python. I can use these skills to construct graphical interfaces and various ways to visualise data.
- I am skilled at designing complex websites using HTML, PHP, SQL and CSS. I can create flexible interfaces that allow for comfortable viewing on mobile devices, alongside elaborate backend databases so that the security of the website can be improved.
- Video/audio editing expertise using DaVinci Resolve/Premiere Pro, Reaper and Logic Pro.
- I am well-experienced in graphic design using software such as Adobe Photoshop and GIMP. This has proved to be a vital skill during web development, as it has allowed me to create user interfaces and logos with a professional and coherent aesthetic.

## **INTERESTS AND ACTIVITIES**

I am a polite, well-mannered, punctual individual who enjoys meeting people from all walks of life. My interests are web development, photography, and audio/video production. I spend most of my free time taking photos using both digital and film SLR cameras, watching a wide range of films and researching music history.
